 GitHub: Clement-A2

---

## PROFESSIONAL PROFILE

Motivated and enthusiastic Information Technology student currently pursuing a **Bachelor of Science in Information Technology at Ghana Communication Technology University**. Developing practical skills in Python, C++, JavaScript, HTML, CSS, Java, databases, and software development.

Experienced in building personal and academic software projects, including **Student Management, Banking Management, and Inventory Management Systems**, as well as responsive web applications. Strong interest in software engineering and full-stack development, with a commitment to continuously improving technical and problem-solving skills.

---

## EDUCATION

### Ghana Communication Technology University (GCTU)

**Bachelor of Science (BSc) Information Technology**  
Currently Pursuing — Level 100

### Attafuah Senior High Technical School

**Senior High School Education**  
SHS 1 – SHS 3

### Newton Presbyterian School B

**Junior High School Education**  
Primary 6 – Form 3

## **Benaga Star Academy**

### **Primary Education**

Nursery – Primary 5

---

## **TECHNICAL SKILLS**

**Programming:** Python, C++, Java, JavaScript

**Web Development:** HTML5, CSS3, JavaScript, Responsive Web Design

**Databases & Data:** SQL, Database Concepts, CSV, JSON, Data Storage

**Software Development:** Object-Oriented Programming, Data Structures & Algorithms, Error Handling, Input Validation, Debugging, Modular Programming

**Tools:** Git, GitHub, VS Code, IntelliJ IDEA

**Other:** Computer Networking, Microsoft Office, Technical Drawing/Drafting

---

## **PROJECTS**

### **Student Management System**

#### **Python**

A modular application for managing student records.

- Student registration and record management
- Automatic student ID generation
- Admission-year management
- Input validation
- CSV-based data persistence
- Statistics and record management
- Custom exception handling
- Modular software architecture

### **Banking Management System**

#### **Python**

A banking application designed to simulate core banking operations.

- Customer and account management
- Savings and current accounts
- Deposits and withdrawals
- Money transfers
- Account freezing and unfreezing
- Transaction management
- Automatic customer and transaction ID generation
- Authentication and PIN functionality
- CSV-based data persistence
- Custom exception handling

## **Inventory Management System**

### **Python**

An application for managing products and inventory records.

- Product management
- Stock tracking
- Inventory updates
- Data persistence
- Input validation
- Error handling

## **Personal Portfolio Website**

### **HTML, CSS & JavaScript**

A responsive personal portfolio website developed to showcase programming skills and projects.

- Responsive design
  - Navigation system
  - Hero section
  - Typing-text animation
  - Project cards
  - Project search and filtering
  - Image carousel
  - Modal interface
  - Dark mode
  - Mobile-responsive layouts
-

## **AREAS OF STUDY**

- Programming Fundamentals
  - Object-Oriented Programming
  - Data Structures & Algorithms
  - Database Concepts
  - Web Development
  - Computer Networking
  - Software Development
  - Information Technology
  - Principles of Entrepreneurship
- 

## **PROFESSIONAL INTERESTS**

- Software Engineering
  - Full-Stack Development
  - Python Development
  - Backend Development
  - Frontend Development
  - Database Development
  - Cybersecurity
  - Artificial Intelligence
  - Computer Networking
- 

## **PERSONAL STRENGTHS**

- Problem Solving
  - Logical Thinking
  - Patience and Persistence
  - Attention to Detail
  - Willingness to Learn
  - Independent Learning
  - Technical Troubleshooting
  - Adaptability
- 

## **WORK EXPERIENCE**

**No formal professional work experience yet.**

Currently building practical experience through academic studies, personal software projects, programming practice, and web development projects.
